Well-known psychologist Piaget says about education. 'The principal goal of education is to create people who are capable of doing new things, not only repeating what other generations have done- people who create, invent and discover. The second goal of education is to form minds that can be critical, can verify, and not accept everything offered.'

Arts faculty provides the starting point for any student who strives to reach these ideals echoed by Piaget. Our main aim of running Arts faculty is therefore to offer students training in the humanities so that they can prepare themselves for making contribution in this new world.
